- Send direct Payment Links to your customers
- Create manual payments directly from your Pay Dashboard
- All payment and settlement data, download reports, and gain in-depth insights
- Manage captures, refunds, and disputes
- Configure risk rules to prevent fraud based on your specific risk exposure

Meet our top Features

Dispute Tools

The intuitive dispute tools protect you from chargebacks. You can easily respond to disputes, track their progress, and provide any required evidence along the way.

Webhooks and events

The messaging system we offer keeps you up to date about the status of all your payments. Customize your notifications to receive the ones that are important to you.

3D Secure 2.0

The 3DS 2.0 solution we work with was certified by EMVCo. It contains a new risk engine rule while securing relevant Card Schemes certifications under PSD2.

Automatic account updater

Don't miss out on sales due to inaccurate credit card data. The account updater keeps all your saved cards updated to keep your loyal customers' checkout process smooth.
