numb3rs

Powered by ◇ ECRYPT

Numb3rs is an all-in-one payment solution built for gaming operators. With the integration of our proprietary tech stack, ECRYPT, we will bring everything you need into one API. ECRYPT offers a central hub for all AML/KYC, fraud prevention tools, payouts, and alternative payment solutions.

It is a holistic solution to bring premier payment and banking services to operators around the globe.
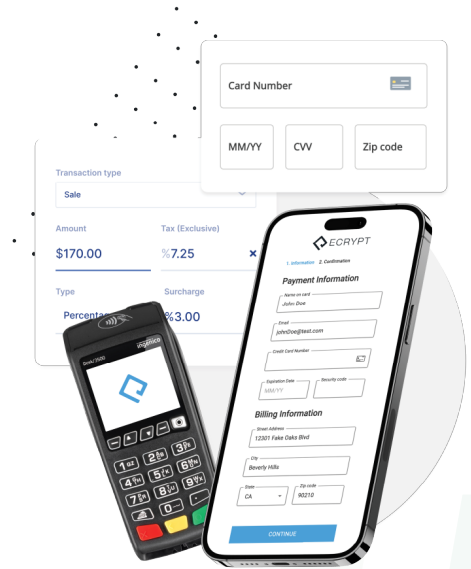

Our success is rooted in our cutting-edge technology and our position in the ecosystem as the processing bank, providing you direct access to our payment network. This approach offers you a direct line to the source. The result: a higher level of service for a substantially reduced price.

This is a scalable and sustainable processing solution. Our mission is to help our clients navigate the litany of state, card brand and regulatory requirements with automation and white glove service. We prioritize mentorship through consulting, advocacy, and delivering concierge-level service to our partners

We are not just a payment processor but a true payments partner.

Numb3rs stands as the agile alternative to the slow-moving goliaths dominating the gaming payments space. It addresses the empty promises often made by agents in the marketplace and counters the insufficient support, guidance, and care provided by existing payment providers.

Numb3rs combines innovative technology with a personalized human experience, establishing itself as the premier partner for payment solutions in the gaming industry.

"It's a Numb3rs game"

Payouts	Integrated AML/KYC	Pre & Post Authorization Chargeback Mitigation
International processing & settlement	FBO accounts	Alternative Payment methods
Proprietary tokenization engine & wallet	Payment Orchestration & Transaction Routing	Level 1 PCI compliant Solution
